PROFILE

Junior Software Engineer with 2+ years of production experience building and shipping systems used in live business operations. Worked on backend systems, API integrations, CI/CD pipelines, deployment workflows, database optimization, and performance improvements across client platforms at MST Developers.

Tech Stack: JavaScript · TypeScript · React · Next.js · Node.js · Express · REST APIs · MySQL · MongoDB · PostgreSQL · Supabase · WordPress · WooCommerce · OpenCart · SuiteCRM · Git · GitHub Actions · CI/CD · Vercel · Azure · Linux · Ubuntu · Nginx · Electron · Vue 3 · TailwindCSS

EXPERIENCE

Junior Web Developer

Jan 2023 – Present

MST Developers · Remote

- On Finmile (delivery optimization platform, React · Next.js · Supabase · PostgreSQL): led repository workflows, pull request reviews, and version control strategy across the development team; Designed and implemented backend schemas, REST APIs, and data workflows.
- Optimized MySQL queries achieving **up to 6× faster load times** and a **90% reduction in order errors** for a major WooCommerce client.
- Automated inventory workflows via custom API integrations, recovering **3–4 hours of manual work daily** and eliminating sync errors.
- Reduced production bugs by **~50%** through architectural improvements, code reviews, and systematic debugging practices.
- Built and maintained CI/CD pipelines with GitHub Actions; cut deployment release cycles from **2 days → under 6 hours** across staging and production environments.

TECHNICAL SKILLS

LANGUAGES

JavaScript TypeScript
Python

FRONTEND

React Next.js Vue 3

BACKEND

Node.js Express REST APIs

DATABASES

MySQL MongoDB Supabase
PostgreSQL

DEVOPS & CLOUD

GitHub Actions CI/CD Vercel
Azure Linux / Ubuntu Nginx

TOOLING & PLATFORMS

Git Postman Figma
Electron WordPress
WooCommerce OpenCart
SuiteCRM

EDUCATION

BS Software Engineering University of Central Punjab

In Progress · Lahore

OS · DSA · OOP · SRE · Business Process Engineering

CERTIFICATIONS

Python Programming
University of Michigan · Coursera

- Managed production deployments, database migrations, environment configuration, and live debugging across client systems hosted on Vercel, Azure Ubuntu VPS, and shared hosting.
- Boosted application performance **80%+** via caching strategies, asset optimization, and mobile responsiveness improvements.
- Built custom modules for OpenCart and SuiteCRM to automate product management workflows and improve CRM usability.

Software Engineering Intern

3 Months (Pre-hire)

MST Developers · Remote

- Contributed to backend development, debugging, and testing for live client systems.
- Assisted in API design and real-world system validation — converted to full-time.

SELECTED PROJECTS

Finmile — Delivery Optimization Platform

REACT · NEXT.JS · SUPABASE · POSTGRESQL · GITHUB ACTIONS · VERCEL

Contract collaboration with MST Developers. Led repository workflows, PR reviews, and version control strategy across the team. Designed the Supabase/PostgreSQL schema, REST API layer, and data workflows. Deployed via Vercel with CI/CD through GitHub Actions.

BookEX — Book Exchange & Community Platform

REACT · NEXT.JS · NODE.JS · MONGODB · AZURE UBUNTU VPS · VERCEL · AI / VISION

Full-stack platform for buying, exchanging, and discovering books with real-time community chat and user feeds. Features an AI-powered book condition reviewer that analyzes cover/page images and auto-grades condition. MongoDB backend self-hosted on an Azure Ubuntu VPS; frontend deployed on Vercel.

Physio Pro — Healthcare Management System

MONGODB · EXPRESS · REACT · NODE.JS

Full-stack physiotherapy management system with JWT authentication, appointment scheduling, and patient records. Secure REST APIs with responsive UI.

NTFS Tool — Open Source Fork

ELECTRON · VUE 3 · MIT LICENSE

Migrated app to Electron + Vue 3 with modern UI redesign. Added ExFAT support, localization, and system monitoring. Removed paid restrictions and shipped under MIT.
